SUMMARY

Dynamic professional with a foundation in software engineering and a strong focus on collaboration and adaptability. Proven ability to develop innovative solutions and manage projects effectively, leveraging skills in Python and React to drive results.

EDUCATION AND TRAINING

Middlesex University Mauritius

BSc (Hons) Information Technology

Expected July 2026

Mauritius

NIIT Abuja

Advanced Diploma in Technology (Software Engineering)

June 2025

Abuja, Nigeria

EXPERIENCE

Freelance Software Developer

Self-Employed

March 2026 – Present

Port Louis, Mauritius

- Increased client satisfaction by delivering **3+ full-stack web applications on time**, by gathering requirements and translating them into clean, production-ready **React** and **Node.js** solutions.
- Improved project efficiency by **reducing revision cycles by 40%**, by adopting an **Agile** workflow with iterative client feedback loops and clear technical documentation.
- Expanded service offerings by successfully deploying projects across multiple clients, by leveraging **cloud deployment** on **Vercel** and containerization with **Docker**.

Software Engineering Student

NIIT Abuja

October 2023 – June 2025

Abuja, FCT

- Strengthened full-stack development skills across **5+ academic projects**, by applying **object-oriented programming**, **data structures**, and **software engineering** principles to solve real-world problems.
- Improved database proficiency, achieving distinction-level results in database modules, by designing and managing relational schemas using **PostgreSQL**, **MongoDB**, and **SQLite**.
- Accelerated team delivery by completing group projects ahead of schedule, by applying **Agile methodologies** and producing structured **technical documentation** to keep all stakeholders aligned.
- Enhanced code reliability across all submissions by consistently applying **debugging**, **testing**, and **code optimization** techniques throughout the development lifecycle.

PROJECTS

SchoolLama — Full-Stack School Dashboard

Next.js 14 | PostgreSQL | Prisma | Docker

- Built a **multi-role school management platform** (Admin, Teacher, Student, Parent portals) with **secure authentication**, **Stripe** fee payments, and real-time data — deployed via **Docker** and **Vercel**.

BMO — Budget Money Online

Next.js 14 | Socket.io | PostgreSQL | Docker

- Developed a **collaborative personal finance app** with **real-time multi-user sync**, zero-based budgeting, **role-based access control** (Owner/Editor/Viewer), and a type-safe **REST API** backed by **Prisma ORM**.

Intelligent Feedback Engine — Final Year Project

Node.js | Express | MongoDB | Groq LLM

- Engineered an **AI-powered feedback analysis system** that interprets and categorizes user submissions using **natural language processing** and a **Groq LLM API** integration, with a Python execution layer for live code validation.

SKILLS

Languages & Frameworks: Python, Node.js, FastAPI, React, Next.js, TypeScript

Databases: PostgreSQL, MongoDB, SQLite

Tools & Cloud: AWS, Docker, Git, Agile Methodologies
